# HOW TO USE YOUR TELEPHONE:

## LONG DISTANCE INFORMATION

Beginning May 25, 1984, AT&T has instituted a charge for commercial long distance information exceeding two calls per month. This cost will be an added expense to EPA; therefore, we request these calls be held to a minimum and that you maintain a listing of these numbers for future use. This will help hold down future costs on our billing. Please use FTS system for long distance information in all direct dial areas.

## LONG DISTANCE CALLS

Federal Telecommunications System (FTS) is a Government Network of long distance circuits through which you can make an official call to any phone in the United States including Alaska, Hawaii, Puerto Rico and the Virgin Islands.

- Calls **from a n FTS telephone to an FTS telephone:** Dial the FTS access code (8) and the 7 digit number.
- Calls **from an FTS telephone to a commercial telephone in a direct dial area:** Dial 8, the 3 digit area code, and the 7 digit telephone number. Note: Calls not in direct dial area must be placed by the FTS operator for that state. (See FTS User's Guide Section)
- **Outgoing collect calls to commercial telephone:** When asked by a non-Government person to call back collect - do not use FTS system, dial 9 and listen for dial tone, dial 0 and place call with Commercial Operator, using an Unrestricted line.
- **International Dialing on Unrestricted Lines:** Calls may be placed to international locations only on special unrestricted telephone lines. For these calls, direct international dialing may be used if the appropriate country and city codes are known. If not, check the local phone book or contact the commercial operator by dialing "9" and then "0".
- **Calls to Canada:** Calls to Canada are placed in the same manner as international calls. The FTS Gateway Operator Service has been discontinued.
- **Official Calls While Traveling:** Authorization Codes and the FTS operator system were eliminated by GSA in order to minimize costs. Consequently, off-net FTS calls may no longer be placed from a commercial phone
- **Minimize phone costs:** Official calls should be placed from an FTS number whenever possible. If commercial service must be used, select the most economical rate for the service required. For example, a short Commercial call may be used to set up a return FTS call.
- If justified, **customer calling cards** may be issued to assure adequate long distance access from locations not serviced by FTS.
- **Toll free long distance calls** (those with area code 800): may be made from any phone by dialing 9-1-800 and the seven digit number.
- **Long distance information** may be obtained from any area to which direct dial FTS service is available by dialing 8 + area code + 555-1212. If direct dial FTS service is not available, use an unrestricted line and dial 9 + 1 + area code + 555-1212.

### SERVICE PROCEDURES AND INFORMATION:

- **Free FTS telephone service:** Any calls being placed from an FTS telephone before 8:00 a.m. and after 5:00 p.m., on weekends and holidays will not be charged to the agency.
- **Changes in the telephone directory:** All changes, additions and deletions to this directory should be reported to Mrs. Nancy Rhew, MD-38, on form EPA(RTP)445.
- **Request for telephone equipment:** Employees should arrange for telephone service through their Administrative Officer (AO). Employees should promptly inform their AO of equipment or services which are no longer needed.
- **Reporting telephone problems:** All repairs must be reported to GSA Telephone Repair at 755-4713 (Raleigh). Under no circumstances should the commercial repair operator be contacted as this can result in unnecessary repair charges. Each organization will be held responsible for expenses incurred by calling the commercial repair operator.
- **Do Not Move or Modify Your Telephone:** Employees are cautioned that under no circumstances may they remove or relocate telephone instruments, or modify existing telephone wiring or instruments.

- Removal of: telephone from EPA premises is considered theft of Telephone Company property, and if detected can lead to arrest and prosecution.
- Relocation: and modifications of telephones violate the telephone tariff, and may result in charges to the Agency, and subsequent adverse action toward responsible employees.
- A telephone service order must be issued by the EPA Telecommunications Section to the phone company for all changes and/or additions. Your Administrative Officer should complete EPA Form 5020-1 to initiate or modify service. (EPA (DUR) 213 is obsolete.)

**OPERATION OF ELECTRONIC STATION FEATURES:**

- **Interoffice calls:** Are made by dialing the last four digits.
- **Local calls:** Dial "9" and seven digit number.
- You may **transfer a call:** from one telephone station to another station within the Centrex System.

  1. This feature is activated by depressing the switchhook once. A recall dial tone (three short tones followed by a steady dial tone) will be heard.
  2. Dial the number to which the call will be transferred, and then either:
     (a) hang up after one ring—the call is automatically transferred; or
     (b) wait until someone answers, announce the caller, and then hang up.
- **Consultation Hold:** You may consult with a third party during an existing call.

  1. To do so, depress the switchhook once, as in call transfer. Three short tones followed by a steady dial tone will be heard. Dial the other station and speak with that person while the original caller remains in a "hold" condition.

  2. Once the consultation is over, wait for the third party to hang up and communication with the original caller will be reactivated. If you receive a busy tone, no answer, or make a dialing error when calling the third party, you may drop the connection and return to the original caller by depressing the switchhook twice.
- **Conference Call - 3 Parties:** To establish a three party conference call, (a) Call the first party, (b) Depress the switchhook once; wait for the recall dial tone, (c) Dial the second party, (d) Depress the switchhook once and all three parties are now in conference.
- **Call Forwarding Options:** Another available feature is call forwarding, the ability to transfer calls to another station automatically. This may be accomplished in two ways.

  1. Call forwarding busy or no answer: This feature automatically routes calls to a preselected station when the called station is busy or no one answers after two rings. (This feature is referred to as "Call Diversion."

  2. Call forwarding variable: This feature allows greater flexibility, it enables you to forward your calls to another extension or any telephone number you can dial from your telephone by dialing 124. It is deactivated by dialing 125.
- **Call Pickup Groups:** This allows employees in assigned groups to intercept calls for others in their group by dialing 123.
- **Call Waiting:** This gives employees the ability to receive a second call on their line while talking. A beep lets you know a second call is camped on. Depress the switchhook and take the second call, when completed you can return to the first caller.

## TELECONFERENCING CAPABILITIES:

- The: Environmental Protection Agency is making Teleconferencing an integral part of our nationwide communications operations. It can assist our employees to become more productive, and speed up both the workflow and decison-making process.
- **To schedule a teleconference, call 382-2663:** The EPA teleconference bridge is available to employees nationwide, including Puerto Rico and the Virgin Islands.
